In geography we use maps to locate places. We use compass directions to know how two places are connected.

Fill in the compass rose below. Remember N = North.

We also use grid references to help us find places on a map. Draw the symbols that you find at each of the grid references in the questions below.

1. 04 23 =

2. 06 24 =

3. 07 23 =

4. 04 26 =

5. 05 25 =

6. 08 25 =

7. 07 23 =
